

Guinea pig.

How to make t:

- Cut the body 2 times
- Cut the ears 2 times
- Cut the belly 2 times
- Cut the part between the head 1 time.

Start to festoon the line from A to C centered over the belly.

Take the between the heat part and festoon the A to the A. The seams are on the inside.

Take 1 body en festoon the line A to C with the feet. Do the same with the other body. The seams are all now on the outside.

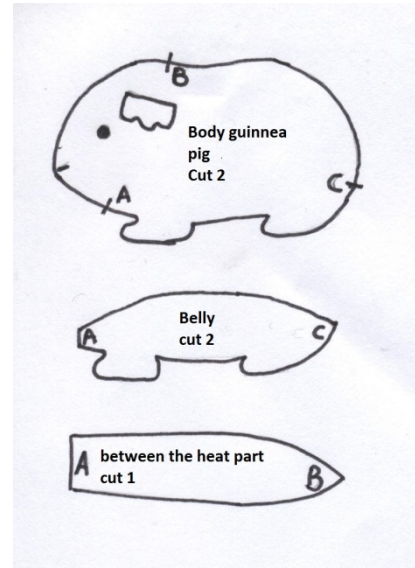

Festoon the line A to B and back to A. The heat part is now finished.

To close the guinea pig you have to festoon the line B to C. Don't forget to fill the guinea pig.

Make the ears en eyes attach to the body. I used beads fore the eyes.

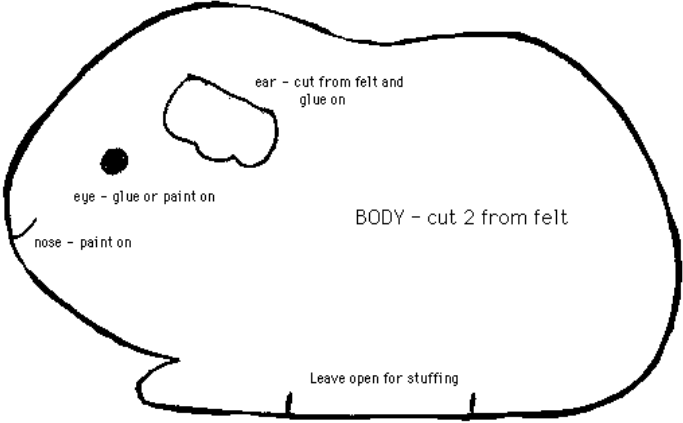

Enjoy your guinea pig.
